

I CLAIM:

1           1. A topical product for application to the skin  
2           or mucosal surface, comprising an oleaginous base of  
3           olive oil, sunflower oil, almond oil, cod liver oil,  
4           castor oil and beeswax, and a pharmaceutically-  
5           acceptable excipient for topical application to the  
6           skin.

1           2. A topical product for application to the skin  
2           comprising about 5% olive oil, about 21% sunflower oil,  
3           about 21% almond oil, about 10% cod liver oil, about 3%  
4           castor oil and about 23% beeswax, the balance of said  
5           product comprising a pharmaceutically-acceptable  
6           excipient for topical application to the skin.

1           3. A topical product for application to the skin  
2           comprising between about 10 and about 50 percent by  
3           weight of beeswax, a pharmaceutically-acceptable  
4           emollient for topical application to the skin and a  
5           pharmaceutically-acceptable excipient for topical  
6           application to the skin.

1           4. The topical product according to claim 3,  
2           comprising between about 18 and about 27 percent by  
3           weight of beeswax.

1           5. The topical product according to claim 3,  
2           comprising between about 23 and about 25 percent by  
3           weight of beeswax.

1           6. The topical product according to claim 3,  
2           further comprising Vitamin A.

1           7. The topical product according to claim 3,  
2           further comprising Vitamin D.

1           8. The topical product according to claim 3,  
2           further comprising Vitamin E.

00840660-034904

21. The topical product according to claim 20,  
further comprising sunflower oil.

1           23. The topical product according to claim 22,  
2    wherein said preservative is butylhydroxytoluene.
